### **HACCP-Concept**

Dear Ladies and Gentlemen

Herewith we confirm to work after HACCP-Framework.

Hazard Analysis and Critical Point (HACCP) has been developed to assure safety of foodstuffs.

In order to guarantee confirmation with HACCP-Rules our work bases upon five fundamentals:

1. A Hazard Analysis has to be done frequently for transporting and warehousing.
2. Critical interfaces and other items in connection with foodstuffs have to be located.
3. Critical interfaces and other items in connection with foodstuffs are those, which attack safety of foodstuffs. They have to be monitored by established processes.
4. Mistakes and problems will be discussed by an adequate skilled HACCP-Team frequently.
5. Frequent further education for all employees will be arranged to improve performance of our company.

"Jürgen Kobernuss Spedition" and "Kobernuss Logistik GmbH" are both certified after DIN EN ISO-9001-2000 and GMP 06 / 07. HACCP-Concept has to be understood in connection to these frameworks and shall optimise performance, especially in transporting and stocking foodstuffs.

Best regards

**JÜRGEN KOBERNUSS SPEDITION**
